Lite, obs. form of LIGHT *v.*[1]

-lite (=F. *-lite*, G. *-lith*, *-lit*), a frequent ending in names of minerals (also in names of certain fossils, as *coprolite*, and of certain types of mineral structure, as *axiolite*), represents the Gr. λίθος stone; the words in which it occurs are mostly intended to correspond to assumable Gr. formations, so that in actual use the ending is almost always *-olite*, with the thematic or combining *o* usual in Gr. compounds; there are a few exceptions, as *auerlite*, *chesterlite*. The form *-lite*, which was used in some original English formations (*actynolite*, etc.) by Kirwan in 1794, is due to the example of the French geologists, who used *-lite* instead of the older *-lithe*, the two spellings representing one and the same pronunciation in Fr. The adoption of the abnormal form was prob. helped by the analogy of CHRYSOLITE, where the *t* instead of *th* is due to the fact that the Gr. word came at an early period into Eng. by way of med.L. and OF.

Little (li·t'l), *a., adv.,* and *sb.* Forms: 1 lȳtel, lȳtel, *Northumb.* lyttil, (lȳtl-, litl-), 2–3 lutel, lut(t)l-, lit(t)l-, 3 lutil, luttel, leitel, 3–5 luytel, litelle, -ul, 3–6 lit(t)el, litell, 4 luitel, littil, lytille, -ulle, 4–5 lytul, 4–6 lytel, -il, -yll, litil(l, littill, -ell, 4–7 litle, 5 litull.e, -ille, -yll, littull, lytyle, -elle, 5–6 lyt(t)ell, lyttyll, lytill, -yl(le, 6 lyt(t)le, lyttil, lytel, lityll, (laytell, lickell, 7 lickle), 6– little. See also LEETLE. [OE. *lȳtel, lytel*, corresponds to OS. *luttil* (MDu. *luttel, lettel*, Du. *luttel*), OHG. *luzzil*, also *liuzil*, ? *lūzil* (MHG., mod.G. dial. *lützel*):—WGer. **lūttilo-*, f. **lūt* (prob. f. the root of OE. *lūtan* to bow down: see LOUT *v.*) represented in OE. *lȳt, lyt* (and the equivalent forms: see LITE *sb.*), and in OS. *luttik*, OFris. *littich*, OHG. *luzzig* little. A synonymous and phonetically similar (but radically unconnected) adj. OTeut. **lītilo-* is found as Goth. *leitils*, ON. *litell* (Sw. *liten, lilla*, Da. *liden, lille*), and possibly in OE. *ītel*, MDu. *ītel*, mod.Flem. *lijter*; the root **līt-*:—pre-Teut. **leid-* may be cogn. with **loid-* in Gr. λοίδορος abuse, L. *lūdus* (:—**loidos*) play; some scholars have compared Lith. *laidau* I let flow, *leidžu* I set free.

The long vowel in OE. *lȳtel* is vouched for by metrical evidence (Sievers in *Beiträge* X. 504) and certain features of the declension (Sarrazin *ibid.* IX. 365), as well as by the early ME. *luitel*. On the other hand, the Northumb. *lyttel*, and the widespread early ME. *luttel, littel*, suggest that the *y* may have been short in some dialects, and perh. generally in the syncopated flexional forms. The modern dialects that are marked by a large Scandinavian element in the vocabulary mostly have the vowel long, the pronunciation being (lăt'l) or the like; this seems to point to influence from the ON. *ītell.*]

A. *adj.* The opposite of *great* or *much.* Compar. LESS, LESSER; superl. LEAST.

These forms, however, are not quite coextensive in application with the positive, so that in certain uses the adj. has no recognized mode of comparison. The difficulty is commonly evaded by resort to a synonym (as *smaller, smallest*); some writers have ventured to employ the unrecognized forms *littler, littlest*, which are otherwise confined to dialect or imitations of childish or illiterate speech.

I. Opposed to *great.* Often synonymous with *small.*

Its customary antithetic association (in mod. Eng.) is with *great* or *big*, not with *large*; on the other hand, *small* is the customary antithesis of *great* or *large*, but not of *big.* One difference between the two synonyms is that *little* is capable of emotional implications, which *small* is not.

1. Of material objects, portions of space, etc.: Small in size, not large or big. Of persons: Short in stature.

1. A name popularly applied to reptiles of the genus *Lacerta*, and to other reptiles resembling these in shape and general appearance, having an elongated body, a long tail, four legs, and a scaly or granulated hide. Ordinarily, the name relates to the small animals of the genus *Lacerta* and other genera of the order *Lacertilia*; by extension, animals like the crocodile, the agama, the iguana, or the great fossil saurians, are often spoken of as lizards. In scientific books, the name is commonly used as coextensive with that of the order *Lacertilia*, which includes many animals which, as lacking either limbs or scales, or both, would not be popularly regarded as 'lizards'.

1. An orthopterous saltatorial insect of the family *Acridiidæ* (characterized by short horns), esp. *Œdipoda migratoria* (or *Pachytylus migratorius*), the Migratory Locust, well known for its ravages in Asia and Africa, where, migrating in countless numbers, it frequently eats up the vegetation of whole districts. Locusts are in many countries used for food.

In the Hebrew Bible there are nine different names for the insect or for particular species or varieties; in the Eng. Bible they are rendered sometimes 'locust', sometimes 'beetle', 'grasshopper', 'caterpillar', 'palmerworm', etc. The precise application of the several names is unknown. *Bald locust*: in Lev. xi. 22 used to render the Heb. קרְחָה *solʕām*, because the Talmud states that this word meant a locust with a smooth head.

Napier does not explain his view of the literal meaning of *logarithmus*. It is commonly taken to mean 'ratio-number', and as thus interpreted it is not inappropriate, though its fitness is not obvious without explanation. Perhaps, however, Napier may have used λόγος merely in the sense of 'reckoning', 'calculation' (cf. Logistic.)

One of a particular class of arithmetical functions, invented by John Napier of Merchiston (died 1617), and tabulated for use as a means of abridging calculation. The essential property of a system of logarithms is that the sum of the logarithms of any two or more numbers is the logarithm of their product. Hence the use of a table of logarithms enables a computer to substitute addition and subtraction for the more laborious operations of multiplication and division, and likewise multiplication and division for involution and evolution.

The word is now understood to refer only to systems in which the logarithm of any number a^x is x, a being a constant which is called the *base* of the system. The logarithms (of sines) tabulated by Napier himself were not logarithms in this restricted sense, but were functions of what are now called the *Napierian* (also *Neperian*), *hyperbolic*, or *natural logarithms*, the base of which, denoted by the symbol e or e, is 2·71828+. This system is still in use for analytical investigations, but for common purposes the system used is that invented by Napier's friend Henry Briggs (died 1630), the base of which is 10; the *Briggsian* or *Briggian* logarithms are also known as *common* or *decimal logarithms*. For *binary*, *Gaussian logarithm*, see the adjs. *Logistic logarithms* (see quot. 1795); also called *proportional logarithms*.

In mathematical notation 'the logarithm of' is expressed by the abbreviation 'log' prefixed to numeral figures or algebraical symbols. When necessary, the base of the system is indicated by adding an inferior figure: thus '$\log_{10} a$' means 'the logarithm of a to the base 10'.

-loger (lōdʒəɹ), the ending of a few words which are virtually adaptations of actual or assumable Gr. words in -λόγος (L. *-logus*): see -LOGUE, -LOGY. The oldest of these is *astrologer* (14th c.); it is uncertain whether this was f. L. *astrolog-us* + -ER [1] (in which case it is an unusually early example of a type of derivation afterwards common), or whether it was f. *astrology* + -ER [1] (cf. the similar formation of *astronomyer, astronomer*). On the analogy of this word, *-loger* was applied in a few instances to form personal designations correlative with words in *-logy, -logic(al*, as in *chronologer*, †*geologer, philologer* (obsolescent), †*theologer* (*horologer* is of different formation). The suffix is no longer a living formative, being superseded by -LOGIST.

1. The branch of philosophy that treats of the forms of thinking in general, and more especially of inference and of scientific method. (Prof. J. Cook Wilson.)

The proper scope of this department of study has been and is much controverted, and books on 'logic' differ widely in the range of subjects which they include. The definition formerly most commonly accepted is 'the art of reasoning'; for various modern definitions see the later quots. At all times the vulgar notion of 'logic' has been largely that it is a system of rules for convincing or confounding an opponent by argument.

In the Middle Ages logic (or Dialectic, q.v.) was one of the three sciences composing the 'trivium', the former of the two divisions of the seven 'liberal arts'.

Pl.* A. xi. 127 Lo, logyk I lered hire and al þe lawe after. *c* 1386 Chaucer *Prol.* 286 A Clerk ther was of Oxenford also, That unto logik hadde longe ygo. 1387 Trevisa *Higden* (Rolls) III. 251 Permenides satte ten 3ere on a roche, and hyþoust hym of þe art of logik. 1390 Gower *Conf.* III. 366 Sche made him such a Silogime, That he foryat al his logique. 1481 Caxton *Myrr.* I. viii. 34 The seconde science is logyke...This science proueth the pro and the contra. 1551 T. -logic (lɒ·dʒik), **-logical** (lɒ·dʒikăl), endings originally occurring in adaptations (through F. and L.) of Gr. adjs. in -λογικός, derived from adjs. and sbs. in -λογος, -λογον, which have derivative nouns of quality or function in -λογία, represented in Eng. by -LOGY. As the meaning of an adj. in *-logic(al)* may with substantial correctness be rendered by 'pertaining to —logy', such adjs. are commonly apprehended as derivatives of the related sbs. (as if f. *—logy* + -IC). In general, the existence of a sb. in *-logy* now implies the potential existence of a correlative adj. in *-logical* (the exceptions being confined to a few of the older words, such as *apology*, which have corresponding adjs. of different formation). For the difference in meaning between adjs. in *-logic* and the (now much more frequent) adjs. in *-logical*, see -ICAL, and cf. the note under GEOLOGIC 1.

By mod. writers the Gr. word is used untranslated in historical expositions of ancient philosophical speculation, and in discussions of the doctrine of the Trinity in its philosophical aspects.

help ye. 'No, you won't', Harvey snapped, as he hung on to the line. 'It's my first fish'.

-logy (lŏdʒi), earlier written *-logie*, an ending occurring originally in words adapted from Gr. words in *-λογία* (the earliest examples, e.g. *theology*, having come through F. *-logie*, med.L. *-logia*). These Gr. words for the most part are parasynthetic derivatives; in some instances the terminal element is *λόγος* word, discourse (e.g. in *τετραλογία* tetralogy, *τριλογία* trilogy); more commonly it is the root λογ- (ablaut-variant of λεγ-, *λέγειν* to speak: cf. LOGOS). In the latter case, the sbs. in *-λογία* usually denote the character, action, or department of knowledge proper to the person who is described by an adj. or sb. in *-λόγος*, meaning either '(one) who speaks (in a certain way)', or '(one) who treats of (a certain subject)'. Hence the derivatives in *-λογία* are of two classes, (1) those which have the sense of 'saying or speaking', examples of which are the words anglicized as *battology*, *brachylogy*, *cacology*, *dittology*, *eulogy*, *palilogy*, *tautology*; and (2) names of sciences or departments of study. As the words of the last-mentioned class have always a sb. for their first element, and *o* is the combining vowel of all declensions of Gr. sbs., the ending of these compounds is in actual use always *-ολογία*, becoming -OLOGY in Eng. The names of sciences with this ending are very numerous: some represent words already formed in Gr., as *theology*, *astrology*; many represent formations which might legitimately have existed in Gr., as *geology*, *zoology*, *psychology*; others are of hybrid composition, as *sociology*, *terminology*, *insectology*. The modern formations in *-logy* follow the analogy of Gr. formations in having *o* as the combining vowel; exceptions are *petralogy* (an incorrect form which some writers prefer to *petrology* because it shows the derivation from *πέτρα* rock, not from *πέτρος* stone) and *mineralogy* (F. *minéralogie*) which may be viewed as a contraction for **mineralology*. The suffix *-ology* is freely used in the formation of humorous nonce-wds., some of which are illustrated below. All the modern formations in *-logy* may be said to imply correlative formations in -LOGICAL and -LOGIST; in the case of some of the older words, the related personal designation ends in -LOGER or -LOGIAN. (Cf. -LOGUE.) Hence

Logy *nonce-wd.* = OLOGY.

MDu. *loteren* to wag about (like a loose tooth), Du. *leuteren* to shake, totter, *Naut.* (of a sail) to 'shiver'; also, to dawdle, loiter over one's work; cf. WFlem. *luttleren*, EFris. *löteren*, of similar meaning. For the development of sense cf. the fig. uses of *loose*, *unsteady*. The sense which the word has in Eng. has not been found in Du. earlier than the 16th c., but may be much older in slang use; the word was prob. introduced into England by foreign 'loiterers' or vagrants. The same root is found in MDu. *lutsen* to wag about.

The diphthong in the first syll. is a substitution for the unfamiliar vowel of the Du. word, which was prob. *ɔ̄* (as in mod. pronunciation) or nearly so.

In the first quot. below, the form *loltrande* may be genuine; if so it represents a distinct word, f. the root of LOLL *v.*]

For examples of the OFr. and med.L. terms see J. M. Manly in *Harvard Studies Philol. & Lit.* I. (1892) 88 ff. The main difficulty is that these terms appear, whenever their sense can be determined, to mean the octave of Pentecost, or Trinity Sunday. Prof. Manly, however, points out that there is evidence that 'Pentecost' was sometimes used for the season beginning at Easter and *closed* by Whitsunday, so that the transference of the name 'close of Pentecost' from Trinity Sunday to Whitsunday, though lacking direct evidence, is not improbable. The use may have been merely local English; the *Ayenbite* and Shoreham both belong to Kent.]

† **Loke't.** *Obs. rare*—[1]. [Of obscure origin.

If the sense be 'lappet', the word might be a dim. of F. *loque* rag, though this has not been found earlier than the 15th c. (Cotgr. 1611 has *loquette*). A dim. of Lock *sb.*[1] would yield an admissible sense, but a hybrid formation of this kind would be unusual at so early a period. It is not easy to see how the word can be identified with Locket.]

13. a. *Phonetics* and *Prosody*. Applied to a vowel (in mod. use also to a consonant) when its utterance has the greater of the two measures of duration that are recognized in the ordinary classification of speech-sounds. Also, in *Prosody*, of a syllable: Belonging to that one of the two classes which is supposed to be distinguished from the other by occupying a longer time in utterance. (Opposed to *short*.) *Long mark*: the mark (–) placed over a vowel letter to indicate long quantity.

In Greek and Latin metre, a syllable is reckoned long (1) when it contains a long vowel or a diphthong, and (2) when its vowel is followed by more than one consonant (to the latter rule there are certain exceptions). A short syllable is conventionally supposed to occupy one time-unit (*mora*) in utterance, and a long syllable two. The distinction between the two classes of syllables, with criteria nearly identical with those of Gr. and Latin, is recognized in the prosody of many other peoples; in Skr. the equivalents of 'long' and 'short' are used of vowels only, syllables being classed as 'heavy' and 'light'.

Various inaccurate uses of the terms *long* and *short* were formerly almost universal in Eng., and are still common. (1) The vowel of a 'long' syllable, if 'naturally' short, was said to be 'long by position'. (2) By a confusion between the principles of quantitative and those of accentual verse, the stressed syllables, on the periodical recurrence of which the rhythm of English verse depends, were said to be 'long', and the unstressed syllables 'short'. (3) In ordinary language 'the long *a*, *e*, *i*, *o*, or *u*' denotes that sound of the letter which is used as its alphabetical name, while 'the short *a*, *e*, *i*, *o*, or *u*' denotes the sound which the letter most commonly has in a stressed short syllable (in the notation used in this Dictionary, respectively æ, e, i, ǫ, ʊ).

He is also said to be 'long' when he holds a good deal. *Mod. Newspaper.* The spinners had gone heavily long, and consequently did not need to buy except in very small quantities. The suppression of the qualified adj., adv., or phrase, in expressions like *to be long about one's work*, causes the adv. *long* to assume the character of a quasi-adjectival predicate = 'occupying a long time', 'delaying long'. Long, obs. form of LUNG; aphetic f. ALONG.

-long (lɒŋ), †**-longs** *suffix*, forming advs. The earliest instance is *endlong*, from ON. *endlang-r* adj., 'extending from end to end', 'the whole length of'. The word is properly a compound of LONG *a.*; but in Eng. it was principally used as adv., and developed the sense 'end-wise', 'end foremost', so that it became parallel in meaning to words like *sideling, headling, backling*. The ending *-long* thus came to be regarded as a variant of *-LING suffix*[2]. Hence, on the one hand, the occasional 14th c. form *endelyng* for *endlong*, and, on the other hand, the substitution of *headlong(s, sidelong(s, flatlong(s* for the earlier *headling(s, sideling(s, flatling(s*.

b. with adv. of manner (†or advb. phrase): To have a certain look or appearance.

This use is often indiscriminately condemned, but is justly censurable only where *look* is virtually equivalent to *seem*, so that it requires a predicative complement and not a qualification of manner. (So, e.g., in quot. 1645.) Owing, however, to the prejudice excited by the inaccurate use, *look* now rarely occurs with advs. of manner other than *well, ill, badly*. In some early instances the apparent adv. may possibly be an adj. in -LY[1].

These compounds, however, seem to be merely modern Germanisms; the relevant sense of the verb, Sw. *löpa*, Da. *løbe*, being app. foreign to early Scandinavian, and due to the influence of the corresponding G. *laufen* (LG. *löpen*). Further, the mod.Sc. form of ON. *hlaup* would be regularly *loup*, pronounced (laup), whereas the word *loop* is in Sc. pronounced (lūp); the spelling *lowpe* in G. Douglas is ambiguous, but prob. represents (lūp); cf. *drowpe* = droop. The Irish and Gael. *lub*, formerly suggested by Prof. Skeat, presents at least a noteworthy resemblance of sound and meaning to the Eng. word.]

Also *Sc.* LAIRD. In exclamations 6 leard, 7–8 lawd, 8 laud, lurd; also LUD. [OE. *hlāford*, once *hlāfweard* (Ps. civ. 17; Thorpe's 'to hálf-wearde' is a misprint: see note in Gr.-Wülck.), repr. a prehistoric form **hlaibward-*, f. **hlaib* (OE. *hlāf*) bread, LOAF + **ward* (OE. *weard*) keeper (see WARD *sb.*). In its primary sense the word (which is absent from the other Teut. langs.) denotes the head of a household in his relation to the servants and dependents who 'eat his bread' (cf. OE. *hlāf-æta*, lit. 'bread-eater', a servant); but it had already acquired a wider application before the literary period of OE. The development of sense has been largely influenced by the adoption of the word as the customary rendering of L. *dominus*. The late ON. *lávarðr* is adopted from ME.

With regard to the etymological sense, cf. mod.G. *brotherr*, lit. 'bread-lord', an employer of labour. In the mod. Scandinavian langs. 'meat-mother' (Sw. *matmoder*, Da. *madmoder*, Icel. *matmóðir*) is the designation applied by servants to their mistress.

For the phonology of the OE. word see BÜLBRING *Ae. Elementarbuch* §§ 367, 411, 562. In the 14th c. the word became monosyllabic through the dropping of the intervocalic *v* and the crasis of the vowels thus brought into contact.]

13. As a prefixed title, forming part of a person's customary appellation. Abbreviated Ld., formerly † L. (*pl.* LL.), Lo.

The rules now accepted for its use are as follows. In other than strictly ceremonial use it may be substituted for 'Marquis', 'Earl', or 'Viscount' (whether denoting the rank of a peer, or applied 'by courtesy' to the eldest son of a peer of higher rank); the word *of*, when it occurs in the more formal designation, being dropped. Thus 'Lord Hartington', 'Lord Derby', 'Lord Manvers', 'Lord Palmerston', may be used instead of 'The Marquis of Hartington', 'The Earl of Derby', 'Earl Manvers', 'Viscount Palmerston'. A baron (whether a peer, or a peer's eldest son known by the title of his father's barony) is always called by his title of peerage (either a surname or a territorial designation) preceded by 'Lord', as 'Lord Tennyson'; if the Christian name is mentioned for distinction, it comes first, as 'Alfred, Lord Tennyson'. The territorial titles given by courtesy to judges in Scotland are treated like those of barons, as 'Lord Monboddo'. The younger sons of dukes and marquises have the courtesy title of 'Lord' followed by the Christian name and surname, as 'Lord John Russell'. These rules were, for the most part, already formulated in the 16th c., but were for a long time seldom accurately observed except by experts in heraldry.

In early use the prefixed title had most commonly the form *my Lord* (see 15) or *the Lord*. The latter survives in certain formal uses, and in the superscription of letters.
